

**More than just learning.
The platform for secure
knowledge sharing and
effective team
connection.**

Fellow LMS+

 **fellow digital**
Succeeding together

● Learning today needs more than courses

Today, organizations are more diverse, more connected and more dynamic than ever. Teams work across roles, locations and languages, and with learning becoming an integral part of your daily workflow. To support this reality, learning needs to be flexible, accessible and continuous, not limited to standalone courses.

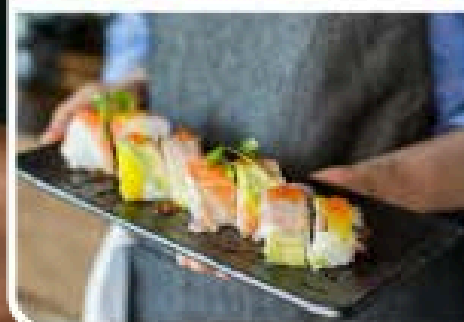

That's why Fellow LMS+ goes beyond traditional learning management.

Our LMS+ is built for organizations where learning, information and collaboration must reach everyone — securely and without barriers, every day.

Welcome to the kitchen team

Welcome to your new role in the kitchen! Our goal is to keep our workspace positive, productive, and safe. This guide will help you get started and understand your responsibilities.

● LMS+ helps you do three essential tasks

Training

make knowledge stick

- Create bite-sized, actionable courses from existing materials
- Support onboarding, compliance, and continuous development
- Track progress, completion, and certification with confidence

Information

keep everyone aligned

- Share updates, instructions, and best practices in one central place
- Make information accessible and always up to date
- Ensure relevant messages reach the right people, at the right time

Connection

learn together, not alone

- Enable communities, feedback, and peer-to-peer learning
- Foster a sense of belonging and shared progress
- Strengthen engagement across all levels, no matter where employees are

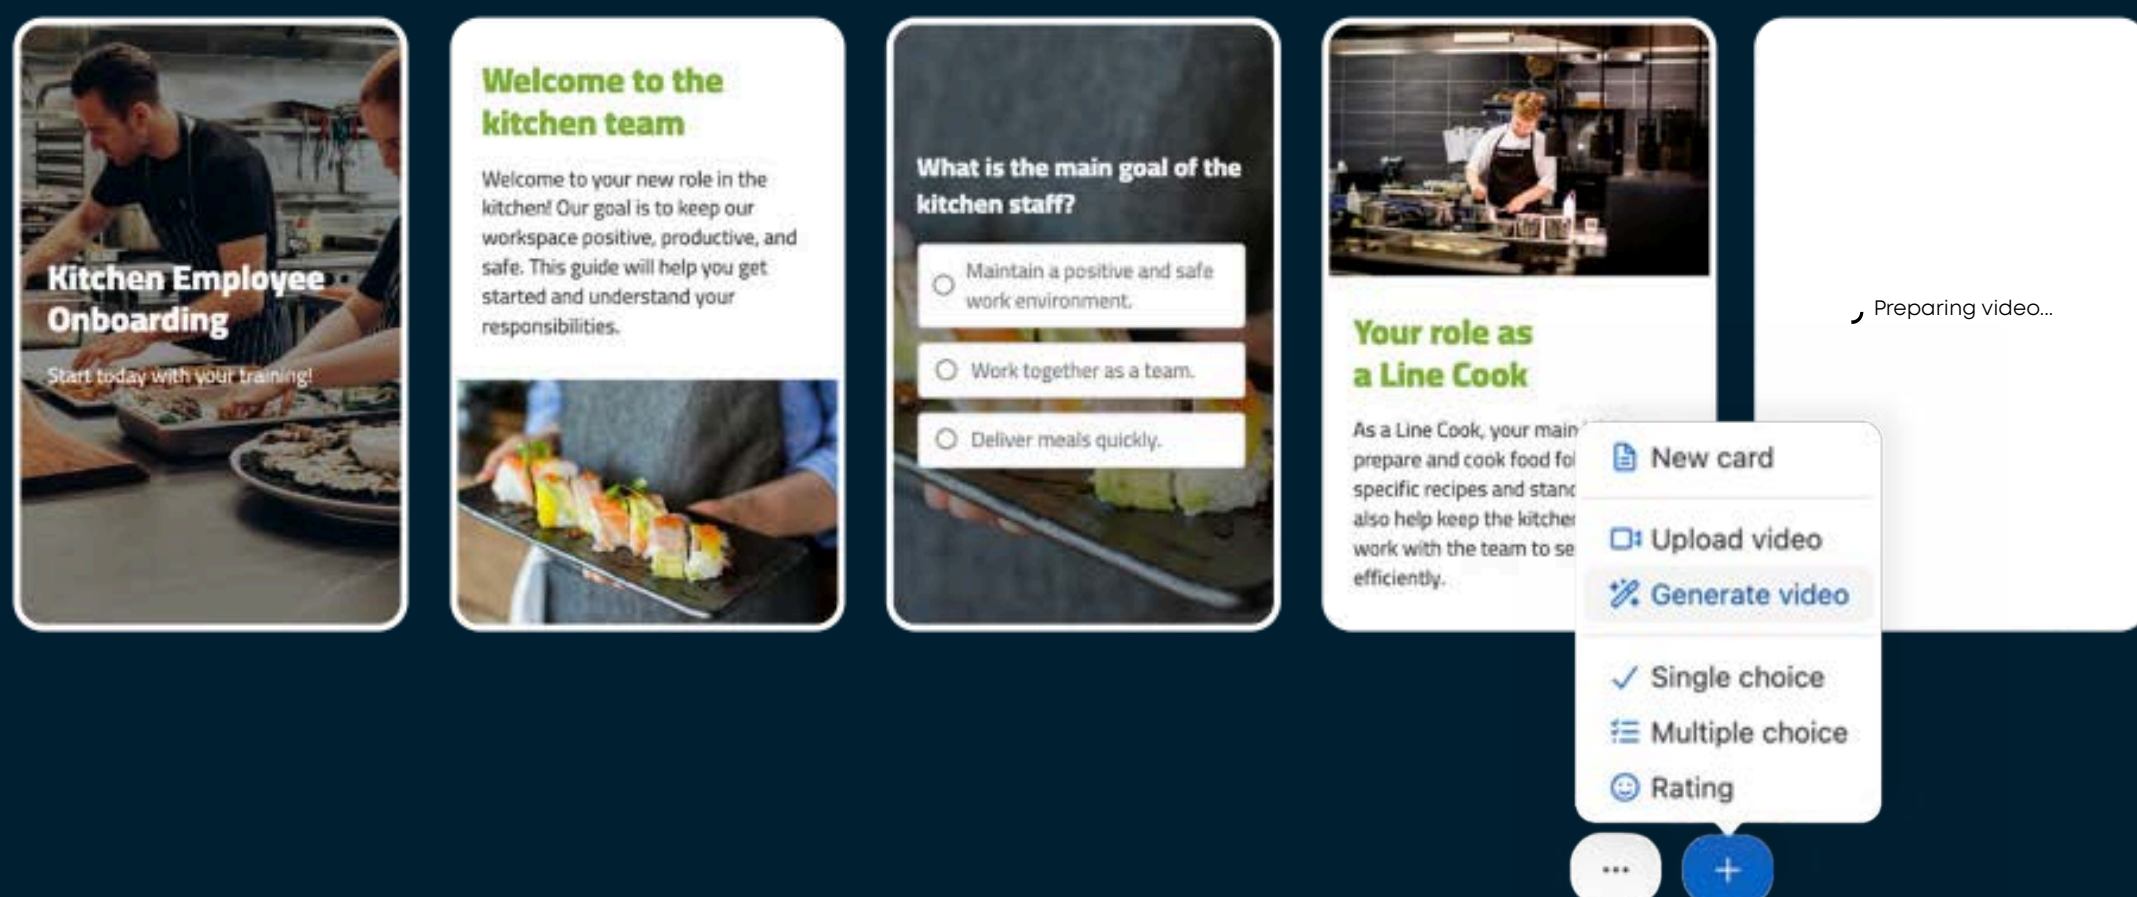

Create courses fast, with or without AI

Training

make knowledge
stick

Turn existing knowledge into learning in minutes. Our **AI Course Generator** transforms any text material into appealing courses, including pictures and quizzes.

**Speed up course creation
by 92%***

- ✓ Transform PDFs, PowerPoints and documents into engaging courses
- ✓ Design, edit and update content directly on the page, no technical skills required
- ✓ Optional: AI generated avatar video to bring even more variety into learning content

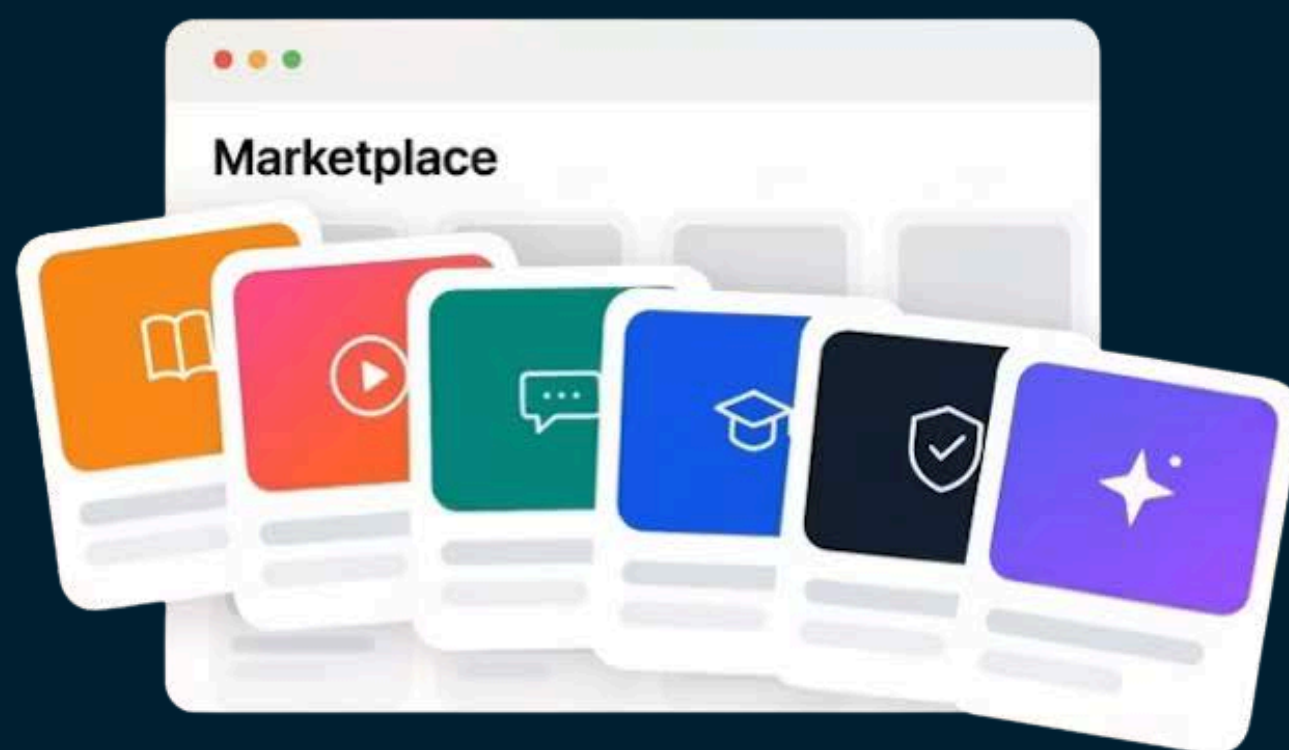

Professional courses for any topic

Training

make knowledge
stick

Where one topic needs to be covered in-house, another leans for being bought-in by professional providers. Fellow LMS offers it all, from DIY course generation to ready-built courses from selected partners in our **Fellow Marketplace**.

No compromise in quality

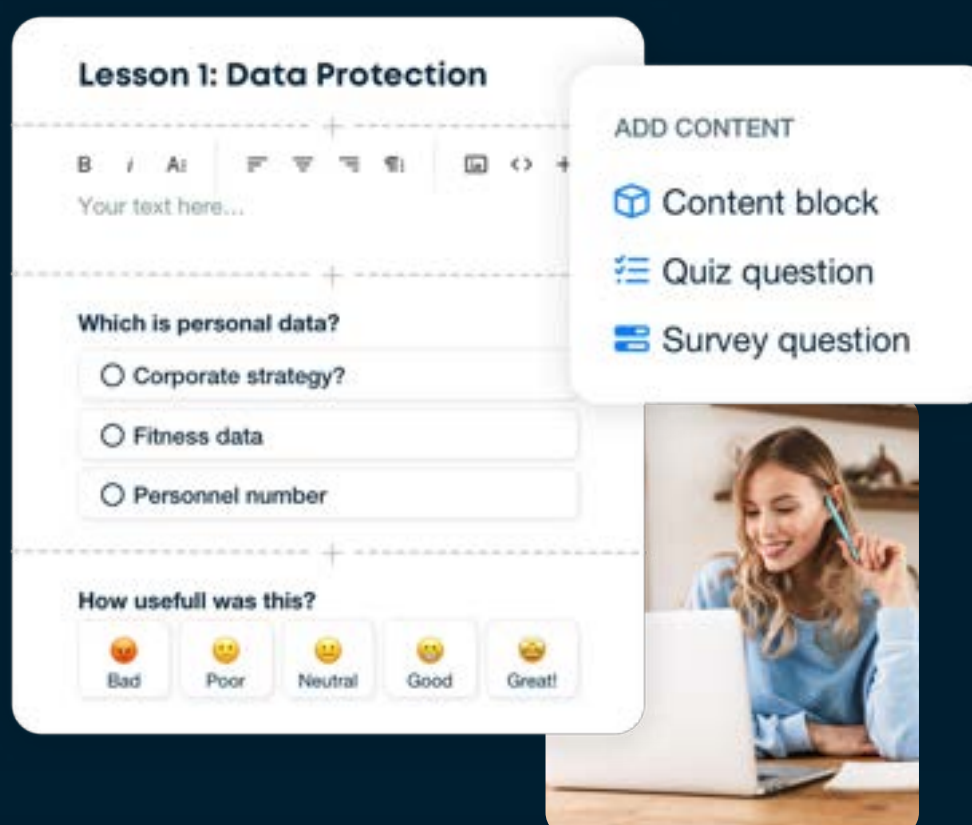

- ✓ Browse the Marketplace with more than 100 ready-built courses
- ✓ Huge course variety from selected partners, from AI awareness to specialized hygiene training
- ✓ Full integration service into Fellow LMS

Training
make knowledge
stick

Track learning progress with confidence

Engaging courses are only the beginning. Embedding them in a coherent learner's journey is where the real magic happens. That's why Fellow LMS comes with multiple options for easy and trackable **user management**.

Up to 3 times higher completion rates

- ✓ From short Microlearning courses to extensive programs – choose your format and get learners engaged
- ✓ Set passing scores, repetition rules, and automatically issue certificates
- ✓ Stay compliant with clear insight into who's finished and who needs support

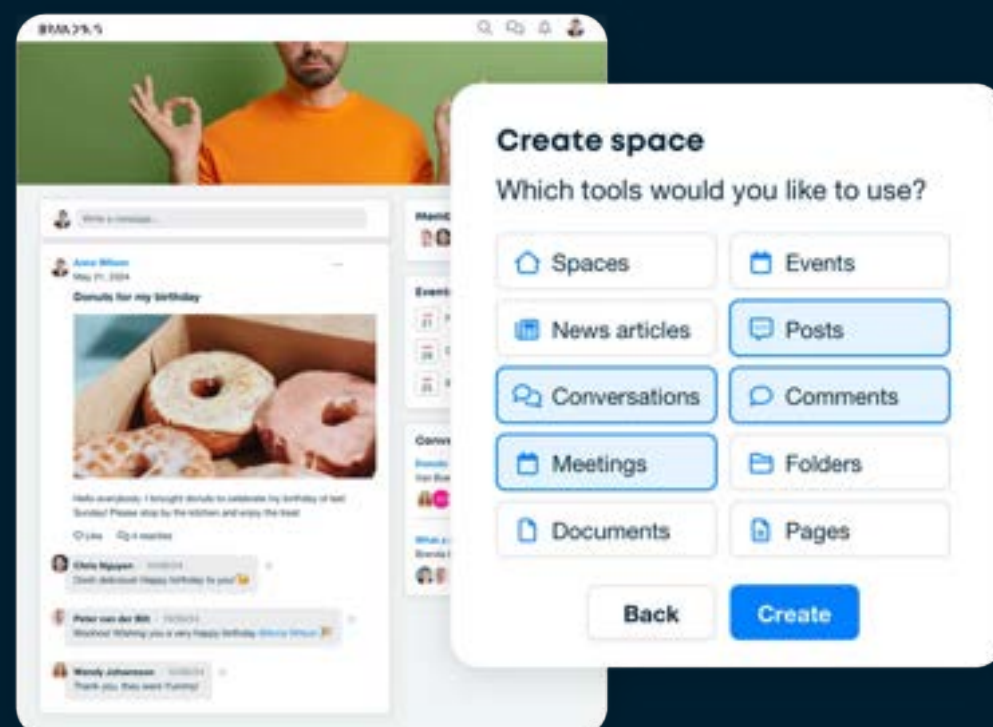

Share knowledge continuously, not just in courses

Information

keep everyone
aligned

Learning doesn't live in courses alone. In practice, knowledge is built, refined and shared every day — in wikis, manuals, FAQs, examples and experiences. LMS+ enables you to create **dedicated spaces** for different types of knowledge.

3 times more use of the platform

- ✓ Individual spaces that are easy to find and accessible to the right people
- ✓ Access settings and permissions per space / user group
- ✓ Updates displayed in every space member's timeline

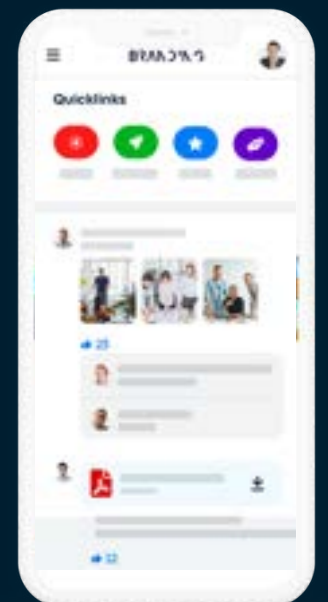

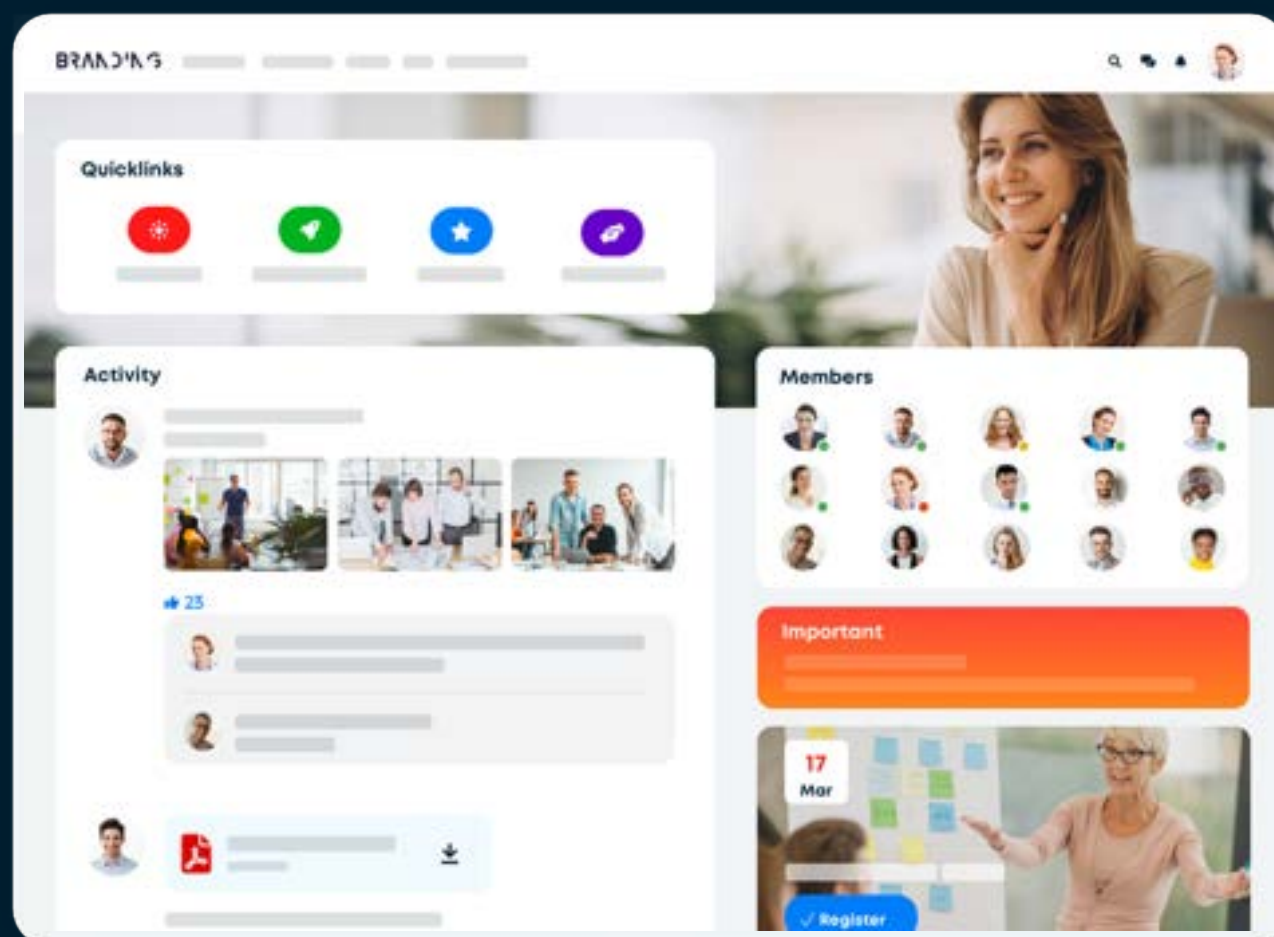

All in one place, your central information portal

Information

keep everyone aligned

Imagine a platform, where all information comes together. From microlearning to extensive learning path, from short news to in-depth document libraries. LMS+ is your central hub, for any kind of information.

Find information 5x faster

- ✓ Structured information portals for policies, manuals and guidelines
- ✓ Wikis to capture evolving knowledge and best practices
- ✓ Quicklinks to most popular resources

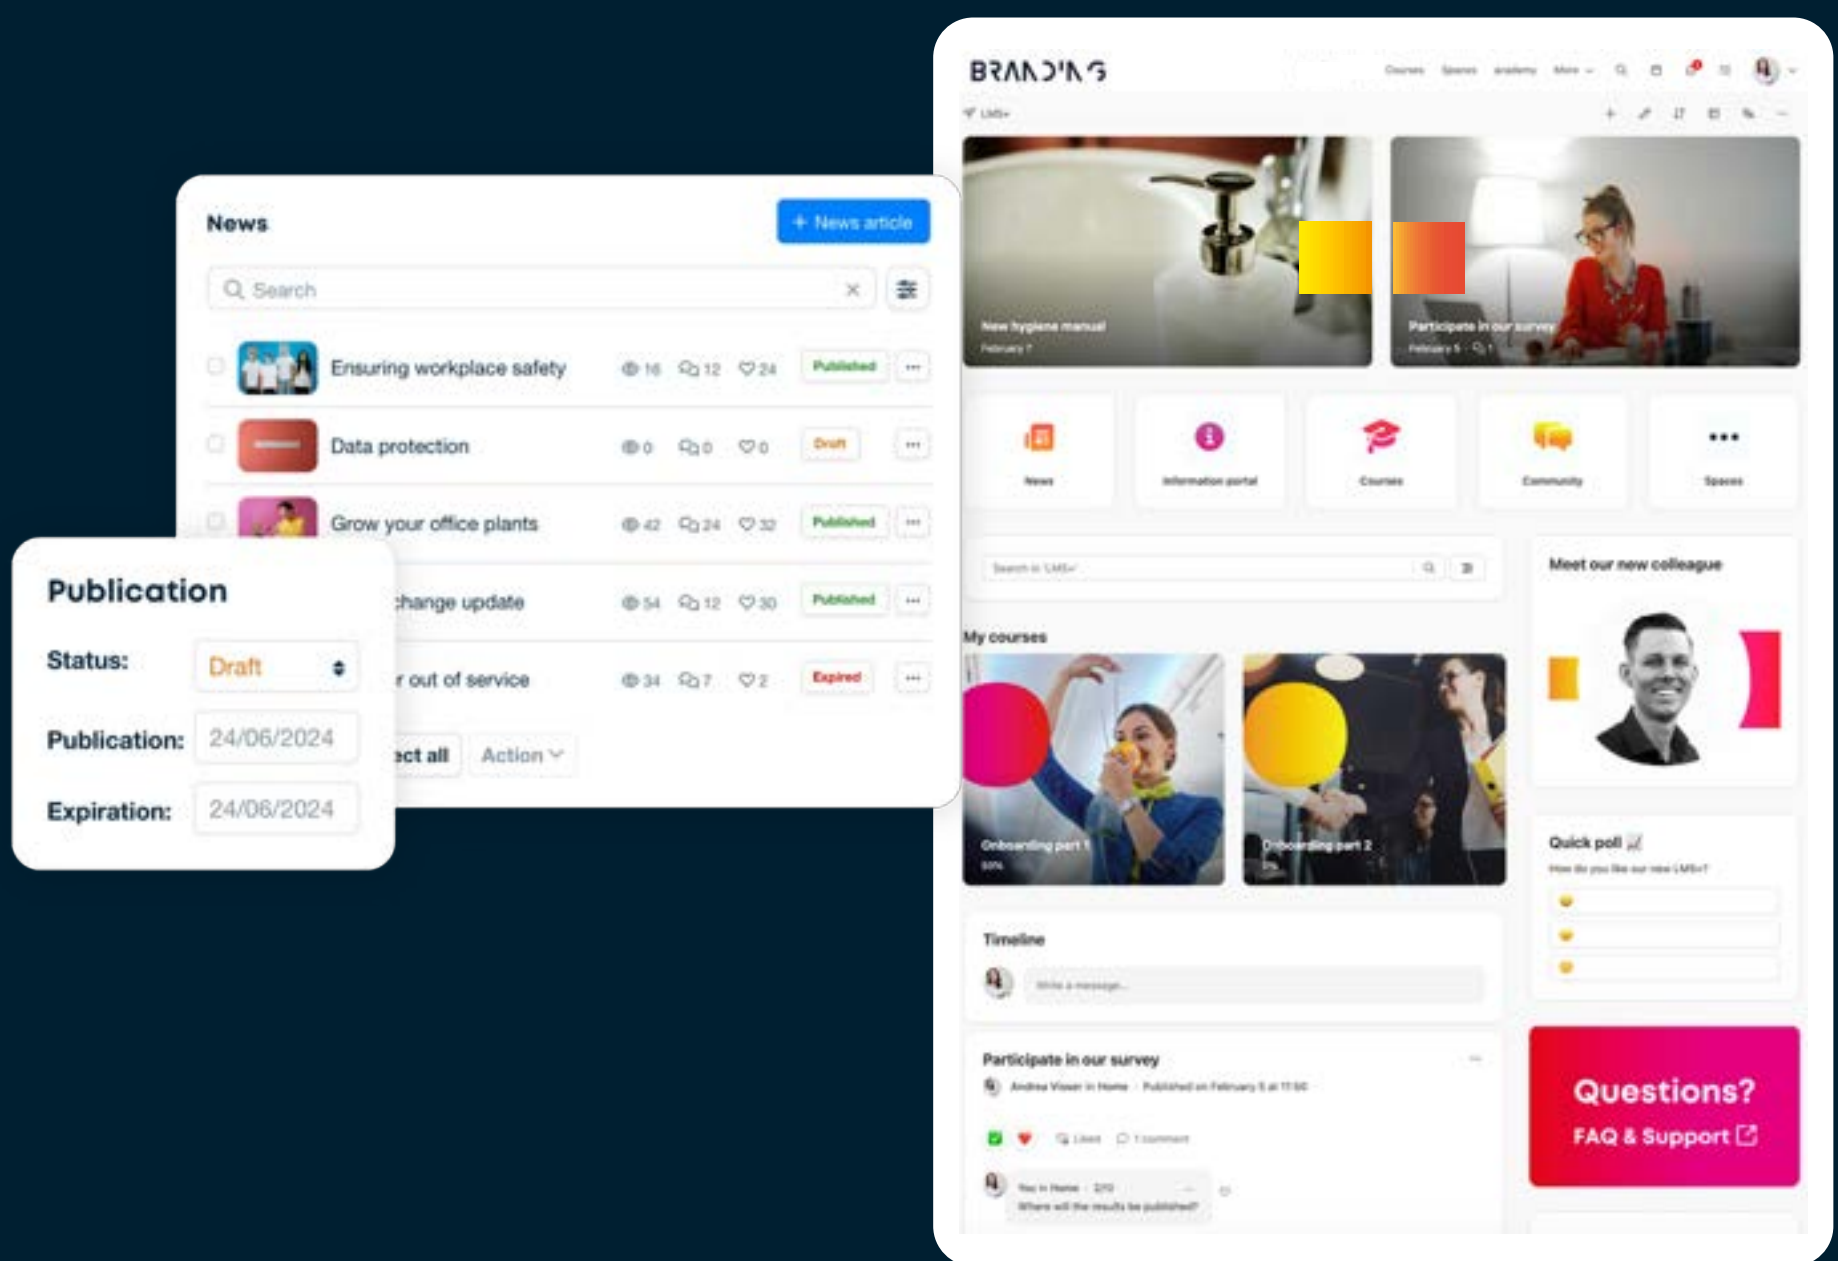

Information

keep everyone
aligned

Everything in view

When people log in, they need instant orientation. “What should I do today?”
“What’s new?” “What matters to me?”

Without a clear **starting point**, information gets missed and learning feels fragmented. That’s why LMS+ offers every participant a personal starting page.

**50% less missing out on updates
& news***

- ✓ Assigned courses at a glance
- ✓ Company news and updates in one place
- ✓ Timeline with news from assigned spaces

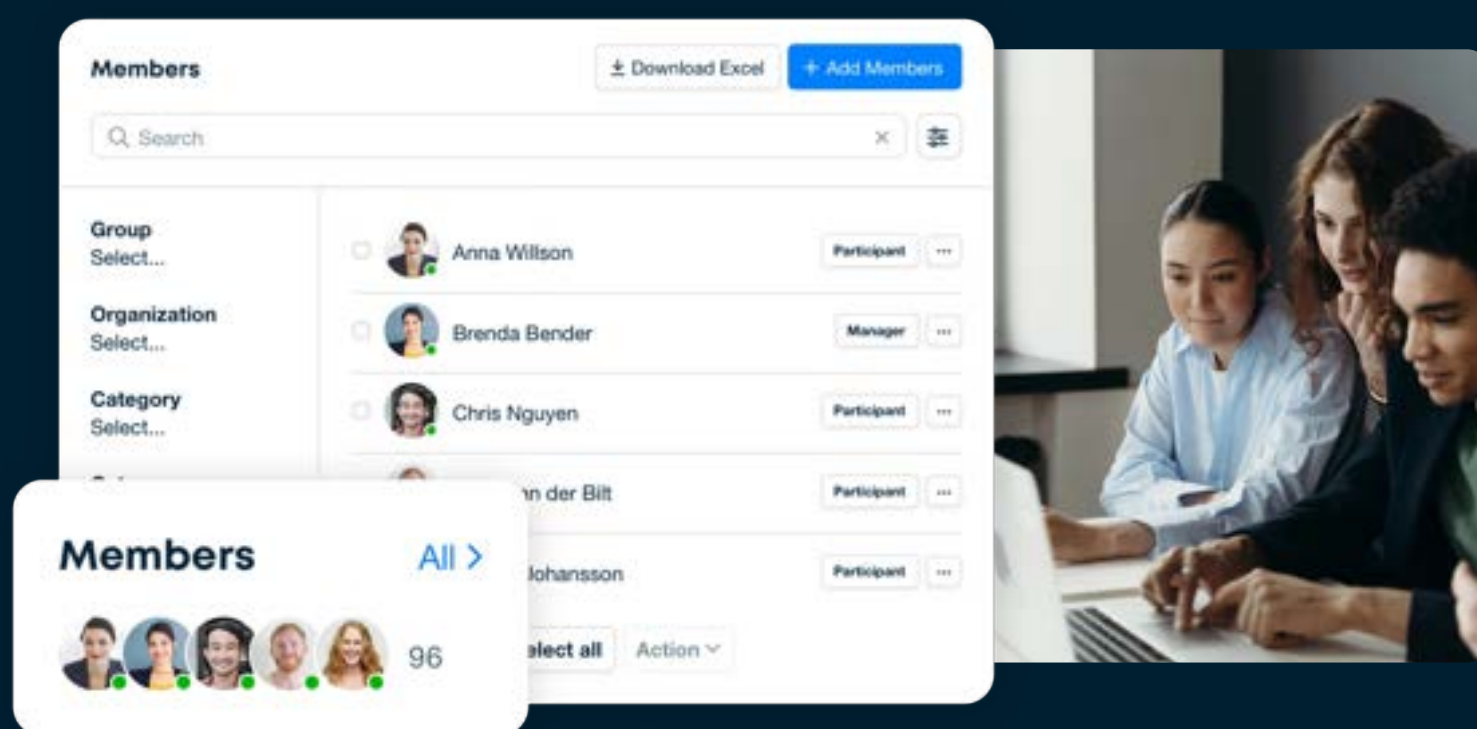

Connection

learn together,
not alone

Build learning communities Together, not alone

Creating a community where feedback flows freely, and ideas are shared, makes learning more meaningful and engaging. The result is a **connected team** that not only learns together but grows together.

Engagement & connection increase by 25-30%*

- ✓ Create groups for teams, locations, and roles
- ✓ Enable feedback, discussion, and peer-to-peer learning
- ✓ Encourage employees to share and learn from each other

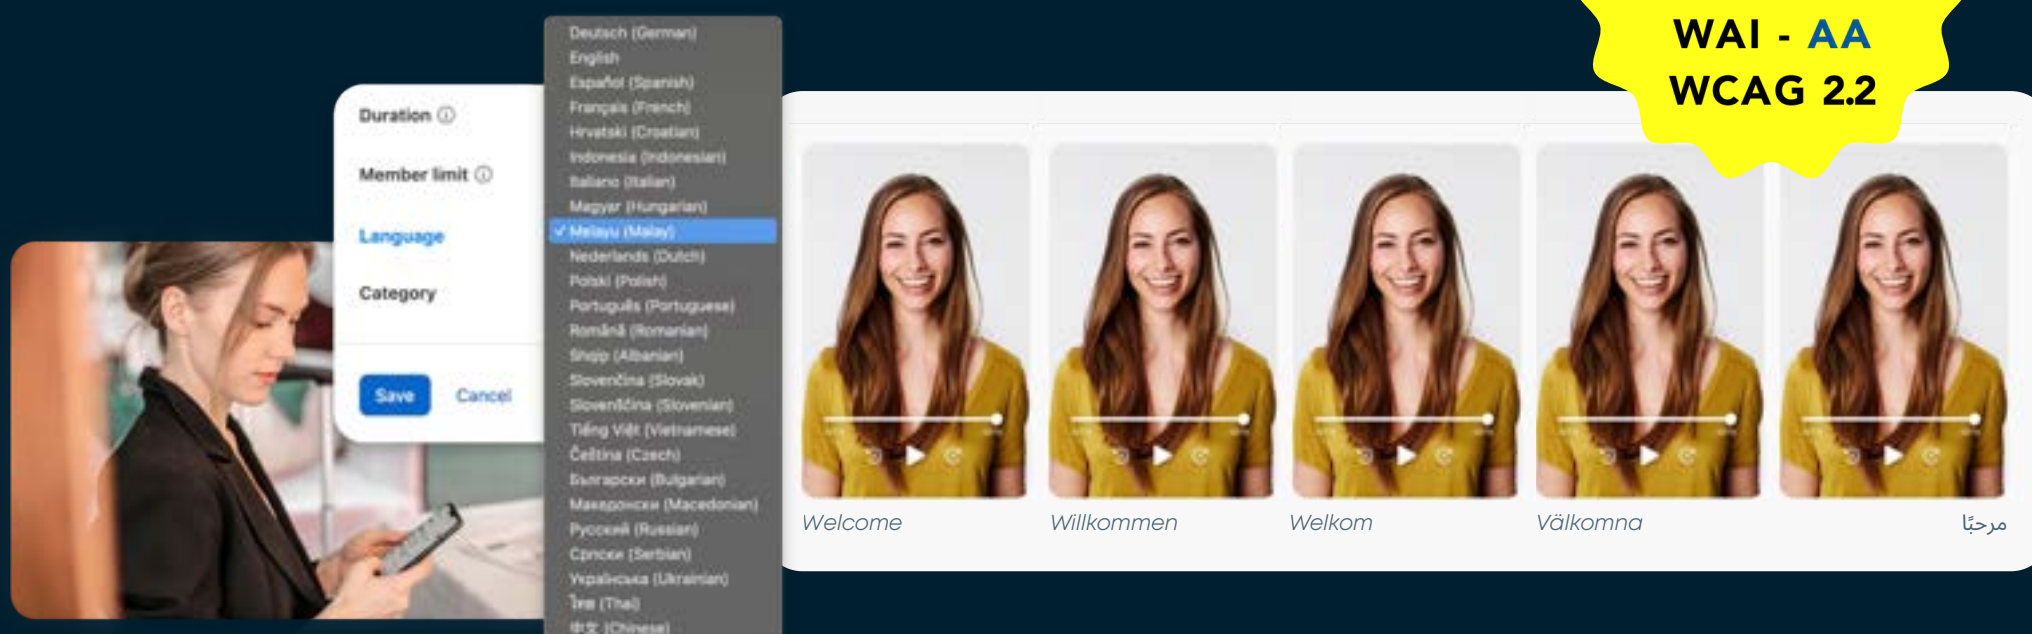

Reach everyone without barriers

Connection

learn together,
not alone

Developed for the entire workforce. No one is excluded due to language, device access, physical or mental limitations – everyone can **participate** and advance the knowledge process **together**.

No target groups left behind

- ✓ Outstanding usability and proven accessibility (WCAG 2.2)
- ✓ Mobile-first design for easy access on any device
- ✓ Multilingual for diverse teams across the globe
- ✓ Email-free access — no need for company email addresses

Clear insights into learning progress and engagement

Measure what matters

Training only creates value when you know what's working — and what isn't. Without insight, learning becomes a checkbox instead of a driver of performance. LMS+ turns activity into clear **insight**.

- ✓ Real-time visibility into progress, completion and engagement
- ✓ Clear test results and learning outcomes at a glance
- ✓ Automatic reminders and course repetition
- ✓ Data that helps you improve learning continuously

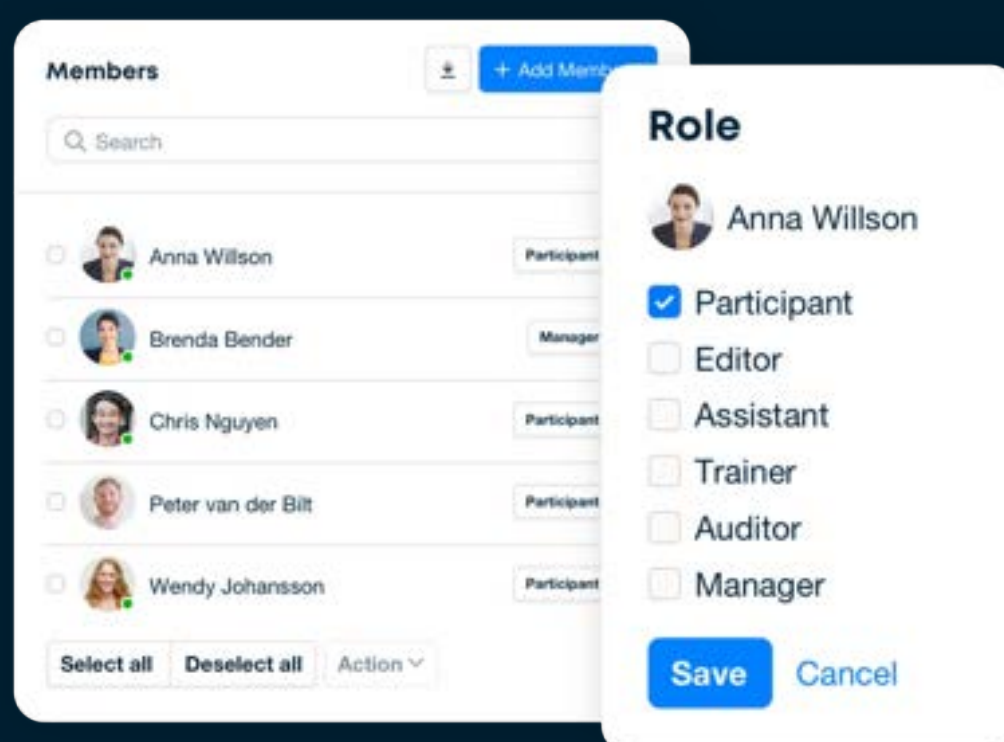

Secure your
content and
data

Protect knowledge, without compromise

Learning and knowledge platforms handle sensitive information every day: Personal data, test results, certifications, and internal communication.

If security isn't built in from the start, trust is lost immediately — and hard to regain. That's why LMS+ is **secure by design**.

- ✓ Working exclusively with EU partners
- ✓ ISO-certified security standards
- ✓ Role-based access and permissions
- ✓ No third-party data training - your content remains yours

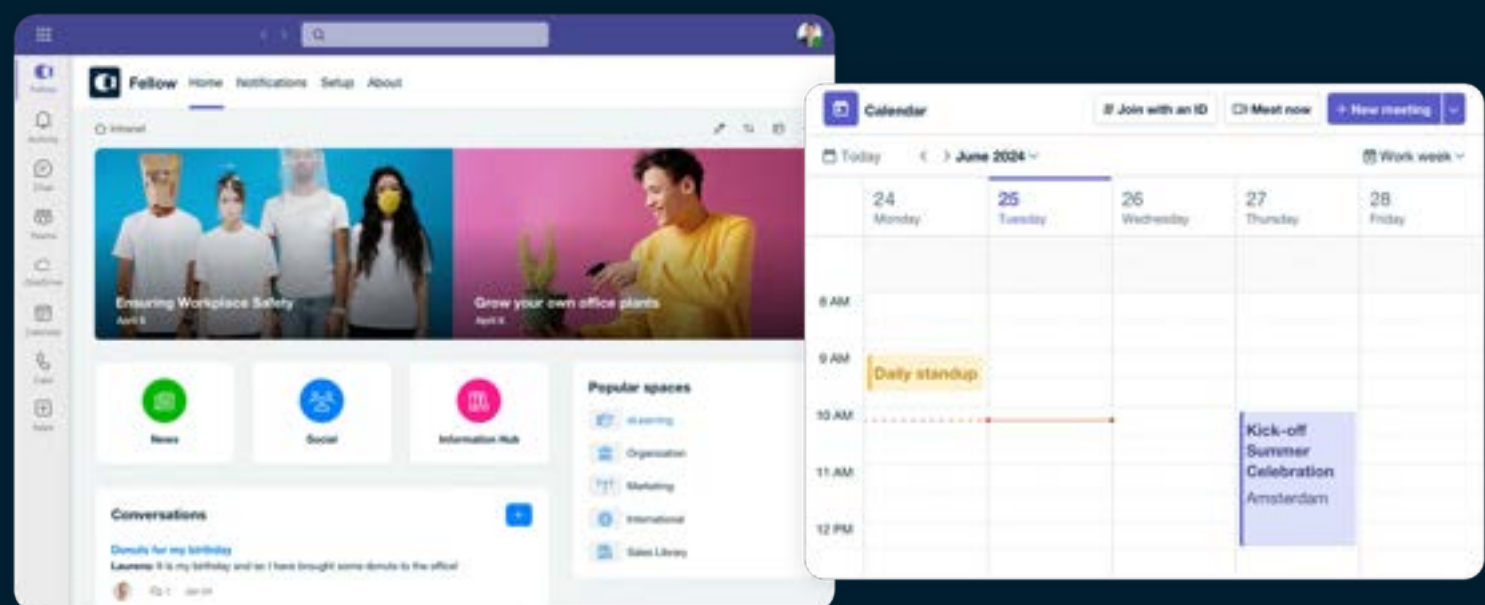

Work smarter
with familiar
tools

Integrate learning, where work already happens

Learning only works when it fits naturally into daily workflows. If employees have to switch tools, remember extra logins, or search for information, adoption drops fast. LMS+ is built to integrate seamlessly into your existing digital workplace.

- ✓ **Microsoft Teams integration**
Access courses, knowledge and updates directly within Teams. One environment, no context switching.
- ✓ **Single Sign-On (SSO)**
Integrates with Active Directory and other identity providers. One secure login for all users.
- ✓ **User provisioning & synchronization**
Automatically add or update users via your identity provider. Always the right access for the right people.
- ✓ **API-based integrations**
Connect LMS+ with HR systems, planning tools or other business software.

● Are you ready for your LMS+?

Fellow LMS+ is built from singular blocks, individually combined for your unique demands. Choose from “Intranet” for news and information exchange, “Community” for connection, “LMS” for training and certification and/or our AI tools for easy course creation. Even external tools integrate seamlessly. Together, they create a unified hub to inform, train, and connect your people.

Ready to build your organization’s LMS+?

Our team is ready to help you get started.

Why organizations choose LMS+

Learning alone is not enough. Fellow LMS+ supports teams in onboarding, training, educating, informing, and connecting. This transforms knowledge into lasting and growing value. Every day, more than **600,000 users** worldwide rely on our platforms for effective knowledge sharing and collaboration.

About Fellow Digitals!

Since 1997, we have been creating great digital solutions that make online working and learning accessible to everyone.

We're founded, headquartered and hosted in the Netherlands, but with offices in Germany, the Czech Republic, Bangladesh and Singapore, we help customers around the world create an integrated platform that brings people closer together and enables them to succeed and grow.

We don't just deliver tools. We build connections.
Because when people grow, teams thrive—and together, we succeed.
